**DETAILED ACTION**

**Response to Amendment**

1. This action is in response to the amendment mailed December 4, 2002.

Examiner regrets the untimely reopening of the case and withdraws the previous rejections to further prosecute the claimed invention. Claims 7, 11, 26, 27 and 28 were canceled and claims 1, 6, 8, 9, 15 and 25 were amended rendering claims 1-6, 8-10 and 12-25 pending.

**Claim Rejections – 35 USC § 103(a)**

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6, 8-10 and 12-25 are rejected under 35 U.S.C. 103(a) as being obvious over ~~Frost et al. (U.S. 5,932,329)~~ in view of Benson, Jr. et al (U.S. 5,796,055).

in view of Frost et al 5932329

4. Benson, Jr discloses an interlayer consisting of a pair of glass sheets comprised of polyvinyl butyral with an intermediate sheet of polyester (abstract) which is a laminated article (column 2, line 62). Benson, Jr discloses the sheets may be made of glass, plastic or a combination thereof (column 3, lines 38-39) which may be of any thickness (column 3, lines 45-46). The reference discloses the sheets are plasticized polyvinyl butyral (column 4, lines 3-4) where the thickness of the intermediate sheets are not limited to the invention and can be increased to raise the stiffness of the article

Art Unit: 1774

(column 9, line 63 through column 10, line 5). Benson, Jr discloses using polyvinyl butryal and a sheet of polyethylene terephthalate (column 11, lines 56-60). A composite laminate interlayer for adhering a glass laminate is directed to intended use, which is given little patentable weight. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Although the reference does not teach a temperature transition or maximum flex modulus, it would have been obvious to one of ordinary skill in the art to include these features because Frost teaches the same materials having the same function as applicants claimed invention. Benson Jr. does not specifically disclose a sheet of polyethylene terephthalate between two layers of polyvinyl butryal layers.

Frost teaches a laminated glass pane comprising two glass sheets and a transparent support film with two adhesive layers (abstract) where the support film of polyethylene terephthalate (column 2, lines 32-34) along with a first adhesive layer joining the support film to the first and second glass sheet of thermoplastic polyvinyl butryal (column 2, lines 37-42). Benson Jr. and Frost are analogous art because they are from the same field of laminated glass sheets. It would have been obvious to one of ordinary skill in the art to include polyethylene terephthalate between the polyvinyl butryal sheets of Benson Jr., because Frost teaches the polyethylene terephthalate intermediate layer helps prevent the shrinkage and optical distortion of the article (column 1, lines 50-57).

***Response to Arguments***

5. Applicant's remarks to rejection made under 35 USC 103(a) as being unpatentable over Frost et al. (U.S. 5,932,329) have been considered moot based on grounds of new rejection.

Applicant's remarks to rejection made under 35 USC 103(a) as being unpatentable over Frost et al. (U.S. 5,932,329) in view of Chaussade et al (U.S. 5,227,241) have been considered moot based on grounds of new rejection.

Applicant's remarks to rejection made under 35 USC 103(a) as being unpatentable over Frost et al. (U.S. 5,932,329) in view of Benson, Jr. et al (U.S. 5,796,055) have been considered moot based on grounds of new rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
